Multiplier Event - Conference Zabrze (Poland)

Prepared by ZS10

Co-funded by the
Erasmus+ Programme
of the European Union

At our conference we would like to present Drone Team project and its results. Drone Team Project is an international project which is supposed to last for three years.

There are four schools participating in the project: Spanish, Slovenian, Croatian and Polish and the fifth partner is a technological institute AIJU from Spain.

Coordinator of the project -IES la FOIA

Šolski center Krško-Sevnica

Tehnička škola Sisak

Zespół Szkół nr 10

AIJU - Technological Institute for children's products & leisure

Co-funded by the
Erasmus+ Programme
of the European Union

Project cooperation makes young people of different interests work together because to build a drone and to understand how to fly it, you need some knowledge of different scientific disciplines - physics, electronics, or even maths.

It is also a great opportunity to encourage young people to start programming. Croatian students designed a game - drone flight simulator.

Polish student is programming a mobile application linked with drone.

They will be able to use the knowledge and experience they gained during the project in their future jobs.

They will be able to use the knowledge and experience they gained during the project in their future jobs.
